ALLY HAWKSLEY

JAN 20 2000

1... MISS ALLY HAWKSLEY: Hello, my name is Ally Hawksley and I'm 12 years old. Why do so many people not want this atomic train to go through? I'll tell you why. First of all, you are carrying nuclear waste. If there would be an accident, an explosion could wipe out whole cities at a time. Secondly, from what I've learned, this mountain where you are planning to bury the waste could be on a major fault line. If there is an earthquake, it would explode, killing all of the innocent people who live near Yucca Mountain. Third, how would you like to be in the history books saying that it was your fault for so many deaths? Please think about others before you do something so careless and dangerous. Please keep the waste where it is. Thank you.
